

ORACLE CONFIDENTIAL

1 37. The method of Claim 36, further including the steps of:  
2 presenting particular data from said table as an object belonging to an object class  
3 and having said particular object id;  
4 said database server executing a database statement that identifies said object  
5 reference; and  
6 wherein execution of said database statement causes the database server to access  
7 said particular data as said object.

1 38. A method for presenting data from a set of one or more tables in a database, the  
2 method comprising the steps of:  
3 reading data from one or more rows of the set of one or more tables based on an  
4 object view that is defined by database metadata and that is based on the  
5 set of one or more tables, the object view defining a presentation of data as  
6 a set of objects that reside in said database, the set of one or more tables  
7 including at least one relational table; and  
8 accessing said data from one or more rows as a set of objects that reside in said  
9 database.

1 39. The method of claim 38, further including the step of said database server  
2 executing a database statement at a database server, wherein execution of said  
3 database statement by said database server causes said database server to access  
4 said data from one or more rows.

ORACLE CONFIDENTIAL

1 40. The method of claim 39, wherein:  
2 said database statement includes an object reference to a particular object of said set  
3 of objects; and  
4 wherein execution of said database statement by said database server causes said  
5 database server to access said data from one or more rows.
